

Please do not allow cell phone use on flights. Overhearing one side of a conversation is very annoying. On an aircraft, there is absolutely no where to go to escape from someone having an inappropriate or loud conversation on a cell phone. I think the ban on cell phone use should be kept as is. Please do NOT amend the rules and regulations permitting ANY cell phone use. Please do not cater to the industry and begin the slippery slope of use by allowing 'emergency' use of phones on the aircraft, either. The policing of such a statute/rule/regulation would render the ban on other use useless. One man's 'emergency' is another man's '???' ...

Thank you for your time and thoughtful consideration.
